

~~Birds Observed~~

Birds observed at Chepachet, Rhode Island.

During a collecting trip to Chepachet, Providence County, Rhode Island, from August 31 to September 8, 1900, I observed the following birds:—

Aix sponsa.— a brood of Wood Ducks was reported at Pascoag Reservoir during August, 1900.

Wood Duck (Aix sponsa).— a brood was reported at Pascoag Reservoir during August, 1900.

Hairy Woodpecker (Dryobates villosus).— Two were seen and an adult female taken September 1, 1900.

Baltimore Oriole (Icterus galbula).— Eight were seen September 1, 1900. This is the latest fall record for the State.

Myrtle Warbler (Dendroica coronata).— Arrived in numbers at Chepachet September 7 and 8, 1900. This is the earliest record of their arrival within the State.

Chestnut-sided Warbler (Dendroica pensylvanica).— Abundant beside the Chepachet River, where it was last seen September 7, 1900.

2

Mourning Warbler (Geothlypis philadelphia). —
One female September 4, 1900. This is, as far
as I know to the writer, the only fall record
for the State.

The following were also observed: Ardea
herodias, A. virescens, Philohela minor,
Helodromas solitarius, Bonasa umbellus,
Accipiter velox, A. cooperii, Buteo borealis,
Megascops asio, Bubo virginianus, Coccyzus
americanus, C. erythrophthalmus, Ceryle alcyon,
Dryobates pubescens medianus, Colaptes auratus
luteus, Chaetura pelagica, Tyrannus tyrannus,
Sayornis phoebe, Contopus virens, Cyanocitta
cristata, Corvus americanus, Passer domesticus,
Spinus tristis, Pooecetes gramineus,
Spizella socialis, S. pusilla, Melospiza
fasciata, Zamelodia ludoviciana, Piranga
erythromelas, Chelidon erythrogaster, Ampe-
lis cedrorum, Vireo olivaceus, Helminthophila
rubricapilla, Comptosia americana neneae,
Seiurus aurocapillus, S. noveboracensis, Geo-
-thlypis trichas, Setophaga ruticilla, Galeo-
scptes carolinensis, Harporhynchus rufus,

Sitta carolinensis, ³Parus atricapillus,
Merula migratoria, and Dialia sialis.

Louis di Zerega Mearns

Newport, Rhode Island, September 25, 1900.

Dendroica striata.

One specimen: No. 156. Dendroica striata.
Ead. Chipachet, Providence Co., Rhode Island.
September 3, 1900. 143; 234; 78; 54;
10.3; —; 17mm.

Aix sponsa. — There is said to be a brood
of Wood Ducks at Pascoag Reservoir in August, 1900.

Ardea herodias. Sept.
